The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest the instant invention regarding a cooling system having a first, second and third cooling pipe having a plurality of fins on a circumferential surface thereof for a passage of a fuel gas flow field, air flow field and coolant circulation flow field, respectively.

U.S. Pat. 4,004,947 to Bloomfield is cited to teach a fuel cell power plant having heat exchange points for a fuel, air and coolant passage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
